Education

Kodir Has University
Sep 2013 - June 2018
Bachelor's Degree
**Interior Architecture and
Environmental Design**
Istanbul / Turkey

Certificates

- Communications, QQI Level 4
Sep 2018 - May 2019
Galway / Ireland
- Drawing, QQI Level 4
Sep 2018 - May 2019
Galway / Ireland
- Art with GRET
Sep 2018 - May 2019
Galway / Ireland

Experience

Interior Architect - Full Time at Gökler Group

February 2023 - Present

Istanbul / Turkey

- Project management for all kinds of public space projects.
- After all the meetings with the customer make 3D rendering and shop drawings.

Co-founder & Head Interior Designer at Interiarc OÜ

October 2019 - June 2023

Dublin / Ireland

- Established the company in Estonia with the Estonian e-residency.
- Took responsibility for all business-related tasks.
- Provided Interior Design Services as a Head Interior Designer.

Interior Architect - Full Time at Spa Edition

September 2022 - November 2022

Istanbul / Turkey

- Drawing all technical plans for the Spa Centers at the Hotel Projects.
- To carry out R&D studies for product and design development.

Interior Architectural Intern at Rönesans Holding

June 2017 - August 2017

Istanbul / Turkey

- Worked with project manager to create project sheets.
- Made revisions to existing plans, sections and elevations in AutoCAD.
- Designed the residence building's service areas.
- Made revisions on factory project using Revit.

Interior Architectural Intern at Erkan Construction

June 2016 - August 2016

Istanbul / Turkey

- Took an active role in the construction site of smart houses project.
- Created daily and weekly reports of the construction site.
- Created technical drawings in AutoCAD according to building survey.

Project Info

The project was located in Gönen, Balıkesir. This was a house project in 70 square feet. Floor plan and all custom furniture designed by me.

Design Explanation

- Your design style is:
- Modern
- Minimalist
- Classy
- Colorful

After I analyse your style and answers, I decided these for your project:

- Using white furniture with colorful accents and storage
- Using built-in bed to save the space and give dimension to the room
- Using efficient storage spaces as much as possible
- Using different materials and patterns to make it more fun

About Floor Plan

You have a rectangle shape room that can easily get a good quality layout. However, the room has two separate windows that divided the room. In this situation, it may get harder to fit some big furniture and storage spaces. With this design, you will get maximum efficiency from your room.

First of all, your main expectation from the room was enough space to enjoy study rest, and organizing for your 16-18 years old time. I decided to use a built-in bed to make the room bigger. I decided to use three separate wardrobes for more things so everyone can have their own individual closet. Also, I located them together so it seems like one big wardrobe. I changed the middle one with a wardrobe door to make it more fun.

After I designed all the rest and storage areas I designed the study space. Once again I wanted to make three individual study spaces for three users. So I chose three different desks and three different chairs and desk lamps. After everyone has a desk, chair, and lamp, we need storage spaces for school supplies. I decided to choose desks that have drawers and two of them have a cabinet. To get more storage space I added two shelves above the desks. Also, for nightstands, I decided to use a small shelf unit to serve all people who sleep the built-in bed and for the other bed. I chose the side table with storage.

For the final touches, I added a wall shelf above the bed and a wall clock next to it and it not only refers to the wardrobe. Also, I added a night lamp for everybody. I chose a colorful rug to make all colors together and make it more fun.

Additional Tips

- The room is 17.2 m² and with this design, you have 9.8 m² free space.
- If you have all the bed accessories (mattresses, pillows, duvets, bed sheets, bed linens, bedspread) you can put by the furniture. In this scenario, your amount will be 12,855 TL.

Design Explanation

- Your design style is,
- Modern
- Minimalist
- Glam
- Shabby Chic
- Rustic

After I analyze your requests, I decided these for your project:

- Increasing closed storage spaces
- Creating a customized children's playground with carpet
- Making empty space for fitness
- TV area away from the windows
- Dining area for quality family time
- Extra lighting to read book and work

About Floor Plan

You have a C shape living and dining room that can easily get a good quality layout. However, the dimensions of the room are a little small to meet all expectations. In this situation, it may get harder to make a perfect floor plan. With this design, you will get maximum efficiency from your room.

First of all, your main expectation from the room was a cohesive room, where you feel relaxed and customized spaces to meet the expectations of the whole family. The biggest furniture you wanted to keep in the space was a large five-door storage cabinet. First of all, this large and useful furniture was placed and positioned on the widest wall in the room. The cabinet doors repaint with the colour of black or dark grey to make a contrast with the white walls as a colour change to show the space spacious. In line with your expectations, extra storage space for the repair tools and shoe cabinet were placed in the garden door entrance area.

The dining area was previously cramped and just for five people. After changing the direction of the table, the number of people increased to six. With adding a carpet, the dining area was customized and the circulation area widened. The air purifier was placed in the middle of the room and the area where the socket is located. For fitness, which is also among your hobbies, and for your daughter to run comfortably, an L-shaped empty space has been created in the middle of the space. Also, a carpet was placed in the middle of the window and the sofa so that you can sit on the floor to play comfortably with your daughter and to customize the playground. Also there will be enough space to place the child table and chair, drawing board and toy kitchen that you already have and wanted to keep.

Design Explanation

Your design style is,

- Modern
- Rustic
- Bright colors
- Glam
- Scandinavian

After analyzing your style quiz answers, I decided to do the following:

- Using wooden furniture
- Choosing fabrics without a pattern
- Using light colors
- Comfortable and ergonomic furniture selection

About Floor Plan

You have an L shape room plan which combine with kitchen and living area. The biggest challenge to make a good layout is all of the walls have a window. In this situation, it may get harder to find a good focal point. With this design, you will get maximum efficiency from your room.

First of all, your main was a big comfy couch to spent time with your big family. For this expectation, I decided to use L shape sofa and placed it in the main corner of the room. Our main furniture is the corner sofa, so I chose a light color to make the space bigger and spacious. After added a coffee table and a rug our main corner is completed. Also, I designed a reading space for a lovely corner that has two big windows. Thanks to that windows it can get full of daylight and I added a floor lamp for task light when needed.

Your other expectation was a big dining table for your family. I placed the table out of the kitchen to make the table bigger and to give you an accessible kitchen. And I added a wall-mounted and foldable table to the kitchen to use it when needed. After designing the dining areas, you have 6 to 11 people dining space. Also, the location of the TV was important to you, so I decided to hang the TV on the wall above the dining table to make it viewable both from the kitchen and the living area. When you hang the TV on the wall, you can get more space. Because of the hallway is the most circulation area of the house, I tried to use as small as possible furnishings for your entrance area.

Additional Tips

- You can use the folding table to get more kitchen counter space.
- The aim of the shelf which placed under the TV is for your electronic items.
- The accessories are optional and without them, your amount will be €1,990.
- You have enough seating place at least 15 people.

Design Explanation

Your design style is:

- Modern
- Minimalist
- Scandinavian
- Loft
- Industrial

After I analyze your requests, I decided these for your project:

- Put the limit of color scheme
- TV area with storage space
- Comfy but elegant look
- Making empty spaces for your pet
- Dining area for quality family time

About Floor Plan

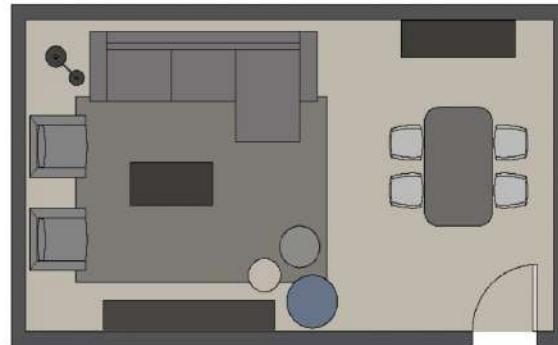

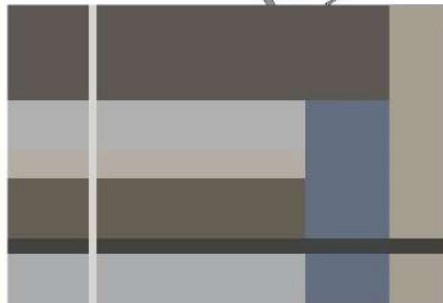

You have a rectangular shape living and dining space that can easily get a good quality layout. However, the dimensions of the room are a little small to meet all the expectations. In this situation, it may get harder to make a perfect floor plan. With this design, you will get maximum efficiency from your room.

First of all, your main expectation from the room was get a spacious and minimalist living and dining area to enjoy with your pets. With this L shape comfy sofa you can relax and play with your pets. Also the fabric of the sofa is special for pets and it can be more useful for your situation.

The dining area was previously in front of the window and the sitting area was cramped because of the room door. After changing the location of the table, and sitting area looks spacious and get more natural light from the window. With adding a carpet, the sitting area looks more cozy and the colors are combined. As for the sitting area, the TV unit was placed on the wall away from the windows. The fact that there is no window in front of the TV and it receives the light from the side will increase the viewing and game quality. The design of the rectangular shaped coffee table is elegant and make the space more stylish. Finally, thanks to the floor lamp placed next to the seating area, the quality of working and reading on the sofa will also increase.

Additional Tips

- You can paint all the walls in a light color such as white that will make the space look spacious.
- You can change the window silk colour with dark colours to add a unique atmosphere to the space.

Project Info

The project was located in Kadıköy, İstanbul. This was a house renovation project in Scandinavian style. The kitchen was designed by me and I was the chief interior designer for the construction. This is a completely baby-friendly living area with a comfy and stylish design.

Bathrooms Interior

Project Info

The project was located in Acıbadem, İstanbul. This was a house renovation project in Modern style. The kitchen was designed by me. Also, I was the chief interior designer on the construction site.
